MEXICAN PLANTS

collected Aug.-Sept. 1938

by

I. M. Johnston

Texas and Coahuila

Texas

- 7000 Cryptantha oblata (Jones) Payson
- 7001 Heliotropium Greggii Torr.
- 7002 Cryptantha albida (HBK) Johnston
- 7003 Cryptantha oblata (Jones) Payson
- 7004 Coldenia canescens DC.
- 7005 Coldenia mexicana Wats.

Piedras Negras -- Monclova

Texas & Coahuila

- 7006 Castela texana (T & G) Rose
- 7007 Eupatorium Greggii Gray
- 7008 Dyssodia Berlandieri (DC) Blake.
- 7009 Psilostrophe gnaphalodes DC.
- 7010 Sporobolus Wrightii Munro Chase
- 7011 ~~Copa~~ Melina nudiflora L.?
- 7012 Cuscuta
- 7013 Roulinia unifaria Engelm.?
- 7014 Celtis pallida Torr.
- 7015 Conzalia viridis nsp. TYPE
- 7016 Schaefferia cuneifolia Gray
- 7017 Triodia texana Wats. Chase
- 7018 Chloris latisquamea Nash unicate det. Chase
- 7019 Dalea lasianthera Gray
- 7020 Desmanthus depressus HBK
- 7021 Ruellia nudiflora var. occidentalis (Gray) Leonard
- 7022 Calyptocarpus vialis Less. --Blake
- 7023 Cordia podocephala Torr.
- 7024 Zexmenia hispida HBK.
- 7025 Lithospermum matamorensense DC.
- 7026 Rivina humilis L.
- 7027 Salvia bellotaeflora Benth.
- 7028 Euphorbia acuta Engelm.
- 7029 Dyssodia micropoides (DC) Loesn.
- 7030 Verbesina
- 7031 Thelosperma
- 7032 Dalea frutescens Gray, var.
- 7033 Calliandra eriophylla Benth.
- 7034 Krameria Grayi Rose & Painter
- 7035 Heliotropium angustifolium Torr.
- 7036 Ipomoea Lindheimeri Gray.

- 7037 *Diospyros texana* Scheele  
7038 *Lippia Berlandieri* Schauer  
7039 *Acacia vernicosa* Standl.?  
7040 *Taxodium mucronatum* Ten.  
7041 *Triodia albescens* Vasey Chase  
7042 *Helenium microcephalum* DC.  
7043 *Aristida adscensionis* L. Chase  
7044  
7045 *Karwinskia Humboldtiana* Zucc.  
7046 *Euphorbia serpens* HBK. det. W.<sup>1</sup>

UNITED STATES DEPARTMENT OF AGRICULTURE  
BUREAU OF PLANT INDUSTRY  
WASHINGTON

DIVISION OF  
PLANT EXPLORATION AND INTRODUCTION

January 19, 1939

Dr. Ivan Johnston,  
The Arnold Arboretum,  
Harvard University,  
Jamaica Plain, Mass.

Dear Doctor Johnston:

Enclosed is the list of names of the grasses received from you some time ago. We are delighted to have these grasses. No. 7132 is a species new for North America. I have referred it tentatively to *Sporobolus phleoides* Hack. from Cordoba, Argentina. The type of this in the Hackel Herbarium consisted of three panicles only, not a leaf present. It is a Stuckert specimen and I understand the Stuckert grasses sent to Hackel were all returned to him except the fragments that Professor Hackel kept. The Stuckert grasses were <sup>stored</sup> deposited in the Delessert Herbarium in Geneva, but when I was there in '22 Dr. Briquet said that Stuckert had left strict orders that the cases were not to be opened. The panicle and spikelets are very like yours, but two collections from Argentina with the same kind of panicle have a base somewhat different from yours. In any case it is a wonderful find. The species will be worked out definitely for your Flora.

No. 7358 is an over mature specimen of *Bouteloua* that does not fall into any species of *Bouteloua*. Mr. Swallen has done the Chlorideae for the North American Flora and has *Bouteloua* well in mind. He hesitated to send this in as an addition to his manuscript because the specimens are well past maturity. We hope on your next trip that you may be able to collect this species again.

I was delighted to see *Muhlenbergia repens* from Mexico. The type was collected in Mexico, and, so far as we know, the species has never since been found south of the United States.

You see what a thrilling lot of grasses you sent us. We are eagerly awaiting results of your next trip.

Sincerely yours,

*Agnes Chase*

Agnes Chase, Senior Botanist
